Math Huskies Wanted!

Problem Solving Workshop

When? Friday's from 1:00-4:00pm

Where? L273

Who? Anyone interested in improving their problem solving skills is welcome to attend!

What? This is a workshop designed to teach you techniques to solve math problems.

Each week, we will discuss a problem solving technique and then work together in small groups, applying the technique to problems.

The math department is looking for students to represent them at the annual APICS math competition at UNB on October 12th. There will be a math contest on Friday, Sept 21 to determine the team that will be sent to UNB to compete in the math contest. See you there!

In December, another team of students from SMU writes the Putnam Math Competition, and we want to be ready! We will be competing against students from universities across Canada and the US. Go SMU go!

Come to the Problem Solving Workshop and win a free trip to New Brunswick!
